

Dina Koepke

Director Governmental at Affairs, Emerson
Climate Technologies

Dina Koepke, Director Governmental at Affairs Emerson Climate Technologies GmbH, is responsible for regulatory affairs at the European level and represents Emerson's Commercial and Residential Solutions group in the relevant European industry associations.

She holds a degree in industrial engineering and an MBA from INSEAD, France. She has been with Emerson since 1999 in various positions and countries in logistics, e-Business, project and plant management, and product marketing for compressors for heat pumps.

In 2012 she took over the responsibility for Governmental Affairs. Her main focus is on the European industry associations, like EPEE (vice chair Ecodesign Working Group), the European Refrigeration Components Association ASERCOM (Marketing WG, Refrigerants WG, Steering Committee) and the European Heat Pump Association EHPA (Member of the Board, Treasurer, Manufacturers' committee and Advocacy and communications committee).

She closely follows mainly European legislation approaches and delivers expertise and guidance to colleagues and industry partners.

Emerson's Commercial and Residential Solutions is a world-leading provider of heating, ventilation, air conditioning and refrigeration (HVACR) solutions, tools and home products for homeowners, businesses and beyond.
