Heating, Cooling & Ventilation: Sustainable technologies for a better life

Anita Derjanecz

Managing Director, REHVA

Anita Derjanecz is Managing Director of REHVA - the Federation of the European HVAC Associations, which joins 120.000 HVAC designers, and building services engineers. She is coordinating the societies activities related to international knowledge exchange, technical development, EU public affairs, and training promoting healthy and energy efficient buildings and communities.

She has 15-years working experience in EU affairs with focus on EU energy, and research policies, as well as in innovation management, technology transfer, strategic planning, and regional development. Before joining REHVA, she has worked as director and Brussels representative of a regional Innovation Agency providing technical assistance for sustainable energy investments, and developing international RTD projects. She also gained experience at a market intelligence consultancy company specialised on natural refrigerants.
