Heating, Cooling & Ventilation: Sustainable technologies for a better life

Peter Hug

Managing Director

- VDMA – German Engineering Federation
- EUnited Cleaning – European Cleaning Systems Manufacturers Association
- EUnited Vehicle Cleaning – European Vehicle Cleaning Manufacturers Association
- eu.bac – European Building Automation and Controls Manufacturers
- eu.ESCO – European Energy Service Companies

Peter Hug is a European expert in building efficiency, sustainability and building maintenance. Peter has an academic background in Finance, Economics and IT. He is working for industry associations linked to the building and construction sector since more than 20 years.

Peter is based in Frankfurt, Germany, and Brussels, Belgium, and promotes building automation and controls as well as cleaning systems as key technologies for the maintenance of buildings. He is an expert regarding widely used building sustainability certificates as well as financing models.

Furthermore he is in charge of various projects for the cleaning systems industry especially in Germany and the whole of Europe. His activities also lead him to markets like India where he works with local Facility Management companies on skilling projects as well as to China, Indonesia and other markets where he promotes German and European technology and expertise both in energy efficiency and sustainability as well as cleaning and maintenance.
